Dec. 13_2011

In the last few years

- **Global Financial Crisis**
- **Huge States Debt**
- **Increased Budget Deficit**
- **Failure of Economic Policies**

As a Result

- **Pressure to Reduce Debt and Balance Budgets.**
- **Halt spending on ICT**
- **Unemployment**
- **Arab Spring !**

While if we spend more on ICT

- **Build e-Infrastructure & Integrate ICT services in Economy.**
- **Thus create a knowledge Base Economy.**
- **Create Jobs**
- **Improve Export Industry**

- **Governments will make a mistake if they cut spending in ICT sector.**
- **ICT Infrastructure & Services will actually help reduce Debt and budget deficit and will create Job opportunities.**

Thank You
