

Palestinian National Research and Education Network

Taleb Alhaj / Palestinian Network
Coordinator

Ministry of Education & Higher
Education

Objectives

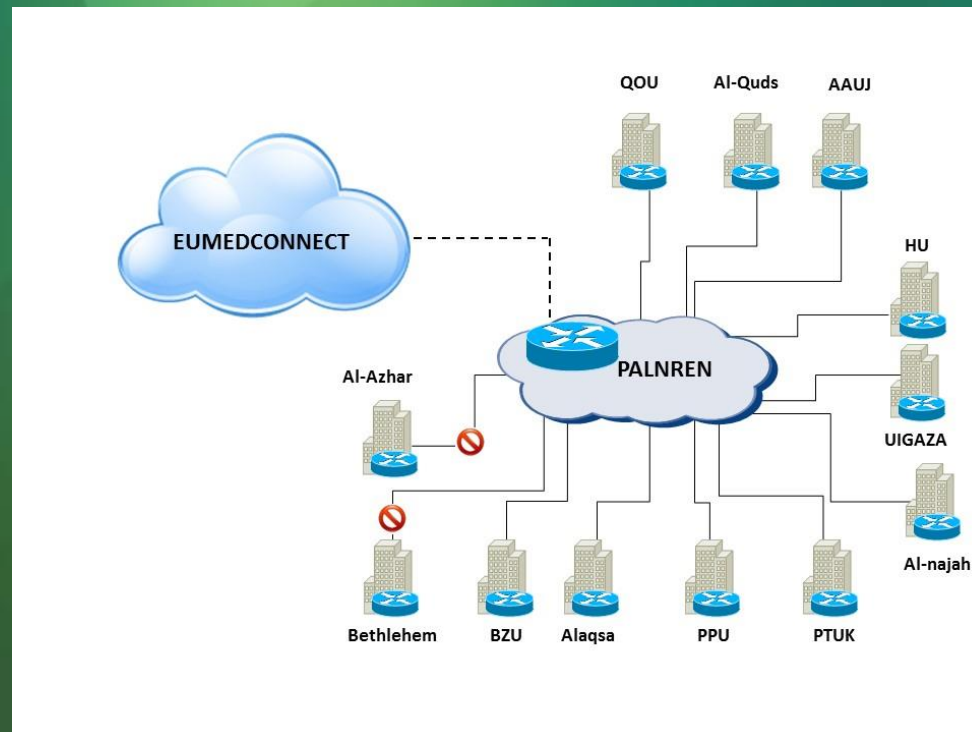

- Developing Palestinian National Research and Education Network, in order to exchange information and linked with the national and international research networks
- Partnership with Arab Network commission for Research and Education as well as the European / Mediterranean Networks

PaINREN should Be

- Advance, low-cost, and as an infrastructure for the academic and research community
- Able to: adapt the technology for serving academic research infrastructure
- Able to: overcome the geographical barriers, and facilitate the Information exchange

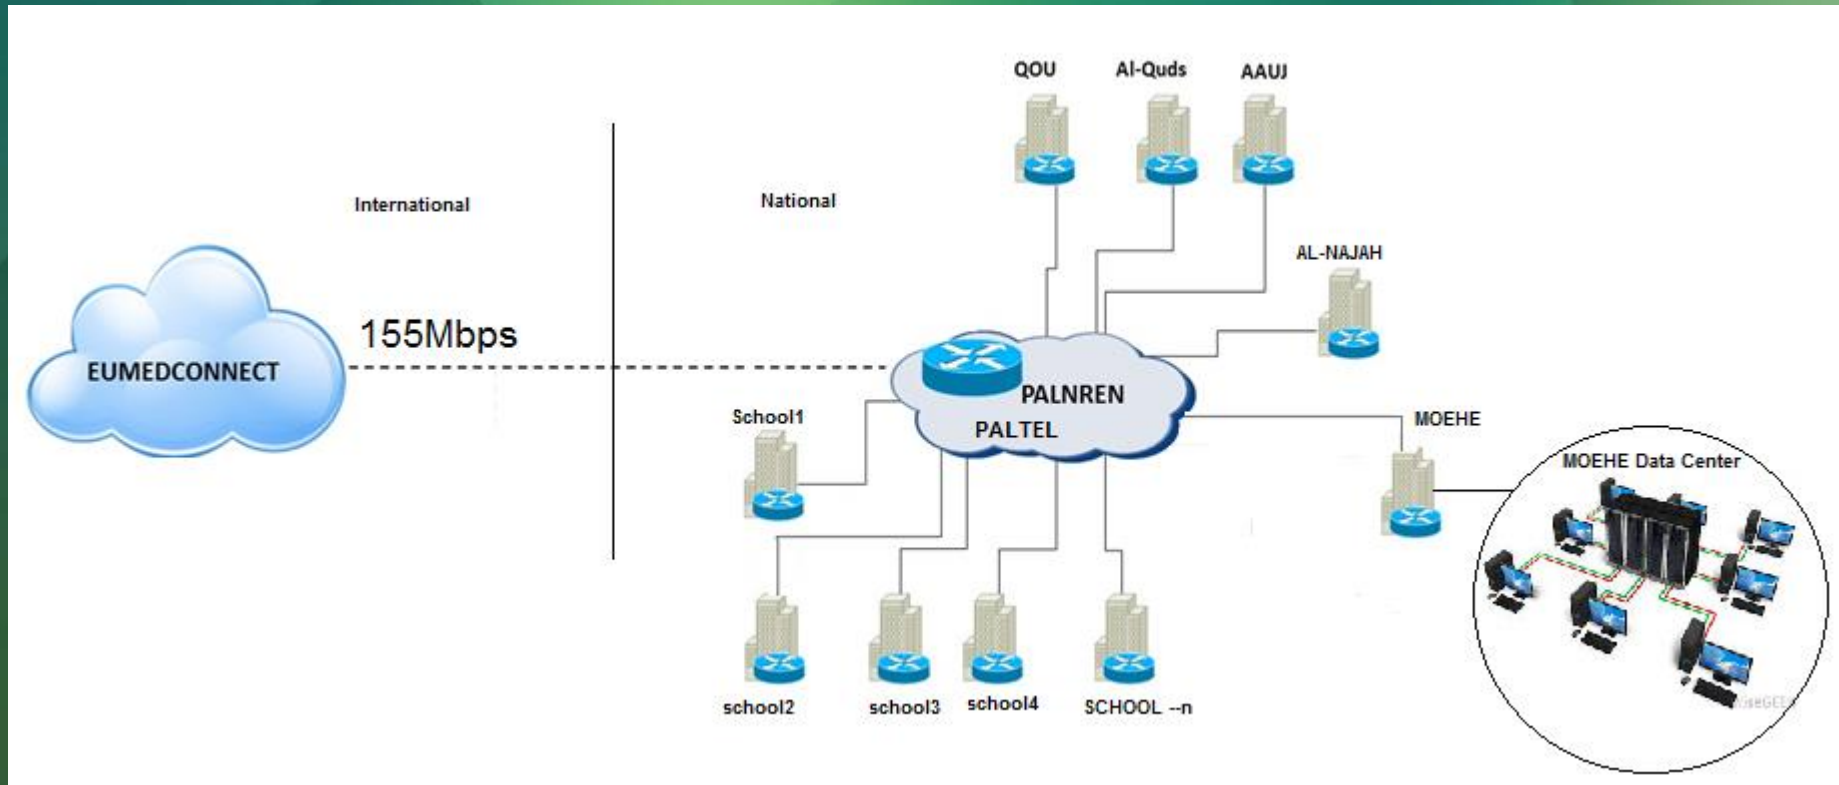

PALREN 2011

- Agreement between the Palestinian telecommunications company /Patel and universities has been signed for sake of fiber optic connection
- the connection has been already established with Mediterranean Networks – with capacity of 45 Mega

The Vision

- The hosting will be on the Computer Center / Ministry of Education & Higher Education
- constructing a model and network to link all public schools with the ministry Computer Data Center

Challenges

- The restrictions which imposed by Israeli occupation as occupying the Palestinian communication space
- Lack of sustainable funding
- Lack of appropriate infrastructure
- Lack of skills and resources
- The appropriate network utilization
