RedCLARA and Latin American NRENs actions in Earth Observations Projects

Luis Cadenas

NREN's Members

- RNP (Brasil)
- Cudi (Mexico)
- Ragie (Guatemala)
- Raices (El Salvador)
- Runba (Nicaragua)
- Conare (Costa Rica)
- Reacciun (Venezuela)
- Renata (Colombia)
- RedCedia (Ecuador)
- Reuna (Chile)
- Rau (Uruguay)
- InnovaRed (Argentina)
- Arandú (Paraguay)

Main goals and actions

- RedCLARA is committed to support SDG goals.
- Americas's NRENs summit in January 2019 in Mexico City established a commitment to foster research collaboration in the Americas.
- RedCLARA and GEANT are implementing the Bella project supporting better and secure connectivity between Europe and Latin America.
- Copernicus data will be transmitted using Bella subsea cable.
- Support to the GEOSS approach fostering open data research standards and building capacities in the region to manage and access the data.

- Providing secure access to data (Universities and Research center in Latin America).
- Working with Amerigeoss since february 2019.
- WG in climate change in RedCLARA.
- Alignment with Amerigeoss priority areas.
- Goal of supporting data and communication infrastructures at regional level.
- HPC availability through Scalac.

Main goals and actions

Main goals and actions

- RedCLARA become a member organization in Canberra meeting past year.
- Strength regional connectivity.
- High relevance of the cooperation with Africa using the new link with Angola.
- Support education and training to people in the region.
